

"PAST AND PRESENT ENTWINED"

Thursday September 27th – Turner Valley, Black Diamond and High River Areas

The 2018 “*Past and Present Entwined*” field tour explores industry and landscape changes through history, unique accounts of remediation and reclamation sites, as well as creative urban solutions for a variety of issues being faced by our communities and the environmental industry. During our visit to these areas we’ll experience first-hand the reclamation, remediation, community involvement, stewardship, challenges and innovations which bring our history and future together.
